03 November 2008

Dear Mark,

**RE: GREASE TRAPS**

I am pleased to advise that after four years and numerous products we have with your kind assistance, eventually resolved the problem experienced with our grease traps.

The combination of products namely, FSR, PITKING and FATKING, supplied by AVANTU, have completely broken down the solid fat build-up we experienced, and the contents of our grease traps are now totally soluble. As a result we are now saving money on ineffective chemicals and man hours previously spent cleaning the fat content in these grease traps.

I would like to thank you for your assistance in resolving this issue and look forward to maintaining this relationship.

Kind regards,

Mike Bunce
