Dear Sir,

Re: Enzyme Treatment to Ivory Park/Rabic Ridge ext 4 & 5

We as the Ivory Park Community Development forum would like to extend our appreciation to you for the project that you have implemented in the Ivory Park community.

We are overwhelmed by what your product has done to eliminate all the health hazards within Ivory Park.

We would also like to extend the appreciation of the residents in Ivory Park. The residents feel that your project should continue until such time that the necessary sewer borne project has been completed throughout Ivory Park, because they feel that the present conditions of the toilets are still in great need of your service.

We are busy negotiating with the Town Council to make funds available, so that you can continue giving us your good service, as required by the residents of Ivory Park.

We feel very strongly that your product and services be extended to other residential, industrial, schools, hostels, hospitals, clinics and informal settlements throughout the country to solve the widespread unconditional health hazards.

Mr Peter Mabena
Health & Environmental Affairs (Head of Department)

THE MEMBERS AND STAFF
ENVIROPURE CC
MIDRAND

21 July 1995

Dear Sirs,

Re: Ivory Park/Rabie Ridge
Sewerage Bio-Augmentation Project

We wish to commend your staff and product in the implementation of treating the Ivory Park/Rabie Ridge sewerage problem which up till now has been of great concern in terms of health hazards, persistent foul smells and prolonged maintenance by means of vacuum tanker removals.

Your "Pitking" enzyme application has proved to be most effective, and in this regard I have pleasure in attaching two letters from the local Civic Community and the Ivory Park forum.

It has been a pleasure to deal with a company that provides a speedy, efficient service and one that has so effectively integrated with the local community.

The contract comprising some 16000 individual sewerage units was completed in 2 1/2 weeks being two weeks ahead of our scheduled programme.

We have no hesitation in recommending your product for similar uses.

Your faithfully

Theunis Potgieter
(Town Engineer)
