### SEWERAGE AND PIT TOILETS HARZARDS :

*Complaints have been received by our office from several government buildings about sewerage and pit latrines.*

*These includes schools, clinics, offices and camps where bad odour or smell has been the more serious particularly during summer as excessive heat and wind makes the situation extremely unhygenic.*

*Being faced with a problem of that magnitude, we decided to use pit king and fat king at Dilopye Primary School next to Temba. The results was that the solids in the toilets decreased in size and the smell has decreased tremendously. This happened within only one week.*

*We therefore would like to have pitting and fat king as a stock item to improve the overrall hygence in other problem areas.*

*We hope our request will meet a favourable consideration.*

*Regards*
